

In 1988
one United States airliner permanently illuminated its
no-smoking sign on all domestic flights;
airlines worldwide would soon
follow its lead.

It only takes one business
that is willing to stand up for what it believes
to lead an entire industry.

It only takes one City Council
that is willing to fight for the health of its community
to lead an entire state to a healthier future
and a better quality of life.

Thank You Pueblo City Council

for illuminating the no-smoking sign
in our community and for protecting our workers and families
from the dangers of secondhand smoke.

On January 1, 2003
Pueblo bars and restaurants
will be smoke-free. Go out and enjoy them.
