

100% Smokefree U.S. Airports

April 1, 2018

In addition to protecting the health of airport employees and patrons, smokefree indoor air policies also benefit airports in other ways. Smokefree airports save money that would otherwise be spent paying for the expensive ventilation equipment, messy filters, and extensive maintenance associated with tobacco industry "ventilation" programs. Furthermore, smokefree airports save precious terminal space, as indoor smoking areas can be used to provide more shops, restaurants, and other amenities. By adopting 100% smokefree indoor air policies, airports choose to save money, space, and most importantly, people's lives.

Below is a **partial** list of U.S. airports that are 100% smokefree indoors, including passenger terminals, airline clubs, and non-public work areas. **There are now at least 620 smokefree airports**, and the list is growing all the time.

For more information, check out our [airports resource page](#).

~ Airports are smokefree indoors due to state law.

^ All enclosed areas of Alaska airports are required to be smokefree by State of Alaska Department of Transportation regulation enacted August 20, 2009.

* The Baton Rouge Metropolitan Airport contains a smoking room, scheduled to be closed in 6/2018.

Number of airports per state derived from the FAA's 2016 [Enplanements at All Airports \(Primary, Non-primary Commercial Service, and General Aviation\) by State and Airport](#).

Note: If you know of other smokefree airports or if you would like assistance in making your airport smokefree, please call us at (510) 841-3032 or email us at info@no-smoke.org.
