#SmokefreeSkies

Welcome to
Philadelphia International Airport
ALL PUBLIC AREAS ARE SMOKE FREE
Thank You

Welcome To Austin!
Live Music Capital Of The World
A Clean Air City No Smoking

Oakland International Airport is a smoke-free facility

100% Smokefree U.S. Airports
In addition to protecting the health of airport employees and patrons, smokefree indoor air policies also benefit airports in other ways. Smokefree airports save money that would otherwise be spent paying for the expensive ventilation equipment, messy filters, and extensive maintenance associated with tobacco industry “ventilation” programs. Furthermore, smokefree airports save precious terminal space, as indoor smoking areas can be used to provide more shops, restaurants, and other amenities. By adopting 100% smokefree indoor air policies, airports choose to save money, space, and most importantly, people’s lives.

Below is a partial list of U.S. airports that are 100% smokefree indoors, including passenger terminals, airline clubs, and non-public work areas. There are now at least 620 smokefree airports, and the list is growing all the time.

For more information, check out our airports resource page.

~ Airports are smokefree indoors due to state law.

^ All enclosed areas of Alaska airports are required to be smokefree by state law, except that designated smoking areas are permitted in the international terminal for passengers who are in transit and are restricted from leaving the airport, and that the Ted Stevens Anchorage International Airport has such a terminal.

Number of airports per state derived from the FAA’s Enplanements at All Airports (Primary, Non-primary Commercial Service, and General Aviation) by State and Airport (updated 11/7/18).

Note: If you know of other smokefree airports or if you would like assistance in making your airport smokefree, please call us at (510) 841-3032 or email us at info@no-smoke.org.
