HEART DISEASE AND SECONDHAND SMOKE

RESEARCH BIBLIOGRAPHY

This partial bibliography of studies is provided for informational purposes only. It should not be considered to replace medical advice from your physician, nor should it be considered as a list of every existing study on this topic. The ANR Foundation is unable to provide copies of any of the studies. Links to either the study's abstract or full text are provided when available. The citations referenced below are presented without comment regarding the source, including any potential conflict of interest. Due diligence is recommended in researching the source of any given study before relying on its conclusions.

- I. The first part of this bibliography lists studies into the effects of secondhand smoke exposure on the heart.
- II. The second part lists studies into the impact of smokefree air laws on heart disease.

I. HEALTH EFFECTS OF SECONDHAND SMOKE EXPOSURE ON HEART DISEASE

Gać, P.; Martuszewski, A.; Paluszkiewicz, P.; Poręba, M.; Mazur, G.; Poręba, R., "[Environmental tobacco smoke exposure estimated using the SHSES scale, and feature tracking computed tomography-derived left ventricular global longitudinal strain in hypertensive patients](#)," *Cardiovascular Toxicology* 22: 940-950, December 2022.
