SMOKEFREE IS SMOKEFREE

Nobody should have to breathe secondhand marijuana smoke at work, in public, or where they live.

Smoke is smoke — regardless of the device or description. Secondhand marijuana smoke contains hundreds of chemicals — just like secondhand tobacco smoke. Many of the chemicals in secondhand marijuana smoke are toxic and contain hazardous fine particles that pose a significant health risk to non-smokers.

- More laws legalizing marijuana = increased exposure to secondhand marijuana smoke.
- Employees and patrons protected by current smokefree laws may have their health put at risk by exposure to marijuana smoke. Marijuana smoking should not be allowed in smokefree spaces.
- The commercialized marijuana industry looks and sounds a lot like Big Tobacco. Together they are working to circumvent progress on smokefree air.
- The vast majority of the population are non-smokers. Smokefree means smokefree — no cigarettes and cigars, e-cigarette use, or marijuana use.

SECONDHAND MARIJUANA SMOKE contains many of the same CANCER-CAUSING SUBSTANCES and TOXIC CHEMICALS as secondhand tobacco smoke, including:

- 3 times the amount of ammonia
- significant levels of mercury, lead, formaldehyde, benzene, hydrogen cyanide, & toluene.

PROTECT HEALTH

Protect workers and the public from exposure to secondhand smoke by prohibiting marijuana smoking in all workplaces and enclosed public places.

As of October 2018, there are approximately 396 municipalities and 15 states that restrict marijuana use in smokefree spaces in some manner. Protect smokefree workplace laws — include marijuana in your policy!
